AR Experience

Aim your camera towards the florelaide map and you will see a foot appear. This foot will show you how big of a piece of ground a person needs to live. Using the feet in the top-right corner you can switch between different sizes:

Map Experience

Two feet will be shown on the map in your screen. These foot will show the average dutch carbon footprint (in red) and the perfect one (in green). The blue point will be showing where you are located. While wandering about you will be able to see here if you are in one of the feet. This way you can get a feeling of the size of these feet and how much area you need.
